

WHO WE ARE

Coverage Broadband Limited (CBL) is an infrastructure-based Internet Service Provider (ISP) with extensive technological capabilities to meet customer and public demand for high-speed broadband and value-added digital services. Our expertise spans wired connections to gateway access, multi-layer network integration, and robust security frameworks that support smart fibre-to-the-X, wireless, and enterprise broadband solutions.

Backed by a strong portfolio of global strategic partnerships, we deliver a rich bouquet of reliable, seamless, and affordable internet solutions with an unrivalled availability profile—ensuring our customers stay connected, productive, and digitally empowered in all they do.

We operate with a forward-thinking digital transformation mindset, continually innovating to build a network that fosters meaningful connections—enhancing productivity in the workplace while enriching the way people live, learn, and play.

As a proudly indigenous brand with a global vision and an exceptional team, CBL consistently reinvents itself through customer-first innovations and strategic investments that strengthen our presence in the technology, telecommunications, and digital economy sectors.

OUR STRATEGIC PARTNERSHIPS

CBL is the exclusive partner of Numbase Global for a range of value-added and fintech-driven digital services, including:

- Advance Credit Services (ACS)
- Data Monetization Solutions
- Handset Financing & BNPL (Buy-Now-Pay-Later) Models
- Additional value-added digital services (VAS) designed to enhance customer experience and drive new revenue streams for operators and enterprise clients

Through this partnership, we bring cutting-edge, future-ready digital financial services to the Nigerian market, enabling operators and customers to benefit from innovative, accessible, and scalable solutions.

THE CBL VISION

We aim to be the most valuable and resourceful company in the world. With a focus to always make our customers a part of every process of creating meaningful services and solutions that help them succeed and thrive.

OUR MISSION

We will consistently innovate, adopt next-generation technologies and expand our network to ensure our customers enjoy unrivalled services through efficient operations.

CBL CORE VALUES

1. **C²** = Customer Centric + Committed to Excellence
2. **B²** = Be Inspired + Build Others
3. **L³** = Listen + Learn + Lead

CBL NETWORK TYPE & STRENGTH

With an expanding graph as well as extensive coverage outlook, CBL network type and strength is optimized for:

- A. Fibre Connectivity:** we provide high availability (99.9%) internet services via fibre cables that connect enterprise business customers to our secured points of

presence seamlessly with a minimum service provisioning TTD of 5-10 working days.

- B. Broadband Internet Access Solutions:** This CBL service capability includes an equipment-based model of transmitting data to and receiving data from all localized Internet endpoints for small to medium scale and home broadband customers.
- C. Wireless Services:** This covers CBL bouquet of wireless plans that connect a customer's device or location to the internet. Such plans are either data only plans or data connectivity plans to cover combined solutions including voice, streaming, video conferencing or gaming services.

OUR SERVICE OBJECTIVES

- 1. SERVICE DELIVERY & RELIABILITY:** we make certain to maintain an SLA and network reliability graph of 99.9% for fibre and land-based services and 98% for radio-based wireless/mobile solutions.
- 2. CUSTOMER SERVICE:** ours is a relationship fostering and technology driven Customer Service Unit (CSU) with friendly and smart individuals that treat all customer requests, inquiries and complaints with the highest level of regard, professionalism and real time resolution and problem-solving expertise that each customer deserve. Our helpdesk is also equipped to handle customer related engagements via phone, email, SMS and WhatsApp.
- 3. TECHNICAL SUPPORT:** we boast a well-staffed and excellent 24hr technical support team that manage reconnections, restorations and downtimes swiftly and efficiently with an MTTR graph of 0-6 hours maximum.
